

Practice Greenhealth Awards 2010

By all accounts Maryland hospitals are leading the way in their commitment to sustainability. At the CleanMed conference this year, Maryland hospitals received a combined 16 of the Practice Greenhealth Environmental Excellence Awards, which celebrate the amazing efforts of healthcare facilities to reduce their environmental footprint. MD H2E was also recognized with the Champion for Change Award.

In honor of this year's award winners, through a partnership with Trees for the Future, 100 trees per award will be planted in Haiti, totaling 27,000 trees!
